---

We fully support Marc Eberlein's plan with regards to the building permit and code proposals because:

1. It will save the homeowner time and money
2. We prefer to hire our own inspection team because they can be held liable, whereas county inspectors can not be held liable.
3. We believe that private inspectors will come when hired so delays will be reduced in the building process.
4. This is a free part of the country where people move to in order to escape layers of bureaucracy, rules, and burdensome regulations; therefore, we support leaders that want to reduce the size of government.
- 5.
