Comment: Dear County Commissioners,

Thank you for considering the cost of our present property inspection program and searching for effective and more timely ways to get the job done at less cost to our local government departments. We need to streamline and organize new methods to get the jobs done when what we have been using just isn't working well any more. Allowing the inspections to be signed off without having to wait as long will also boost the local economy by allowing jobs to be completed more quickly and builders can get on to the next job and collect their money in a more timely fashion. It will also benefit our local inspectors. Any changes that put more into the pocket of the private sector of business builds up our local economy. Bravo, Gentlemen, for thinking outside this big government box that has been taking over!!! Thank you for your service to our community!
