

KOOTENAI COUNTY SOLID WASTE DEPARTMENT
TIRE POLICY

This Department Policy governing the disposal of solid waste is promulgated under the authority of Title 4, Chapter 3 Kootenai County Code as it exists or may subsequently be amended and is effective on May 1, 2013.

Director, Solid Waste Department

POLICY

The Kootenai County Solid Waste System will accept tires for disposal but will not landfill tires. Tires will be processed for recycling to meet the requirements of Chapter 65, Title 39 of the Idaho Code as amended.

PROCEDURE

Chapter 65, Title 39 of Idaho Code defines proper disposal procedures for waste tires. This legislation provides for a fine of \$500 per tire if disposed of improperly.

Private residents may dispose of a maximum of eight (8) regular-sized vehicle tires per calendar year at a transfer station free of charge provided the tire is not on the rim. Individuals desiring to dispose of a regular-sized vehicle tire mounted on the rim will be charged a processing fee for rim removal as set forth in the current fee resolution. Individuals desiring to dispose of more than eight (8) tires within a calendar year will be charged the commercial rate for disposal of tires pursuant to the current fee resolution.

Private residents may dispose of oversized tires at the current oversized tire disposal fee as set forth in the current Fee Resolution. No oversized tires on rims will be accepted.

Commercial companies desiring to dispose of tires will be charged at the current disposal rate as described in the Fee Resolution. Oversized tires will not be accepted mounted on rims. Commercial companies desiring to dispose of regular-size tires mounted on rims will be charged an extra fee per tire for each tire mounted on a rim as set forth in the current Fee Resolution.

Tires will be shipped to tire markets located within the Pacific Northwest. Care will be taken to assure disposal at shipping destinations will not be through landfill. All tires shipped

TIRE POLICY

from the Kootenai County Solid Waste System must be recycled in a manner which precludes disposal through landfilling to comply with the intent of the Idaho Code.

Waste tires from bicycles and wheel barrows and lawn mowers are exempt from recycling requirements and may be landfilled.

Although the legislation does allow for the burying of mining tires, Kootenai County will not accept any oversized tire from a commercial source for disposal without an additional fee consisting of the current disposal fee outlined in the current Fee Resolution. For oversized tires from commercial sources, the following disposal fee formula will be applied:

current disposal fee + oversized tire fee

Waste tires, regardless of source will not be disposed of through the Rural System or local curbside garbage collection service. This is necessary to preclude inadvertent landfilling of tires.

Should tires be identified in the waste stream, co-mingled with general refuse, every effort will be made by Transfer Station and Landfill personnel to safely extract the tire from the refuse prior to landfilling.

ENFORCEMENT

Customers disposing of waste tire disposal in a manner which does not conform to the procedures outlined above may be denied disposal until proper procedures are followed. Failure to follow prescribed procedures may be deemed as improper or unlawful disposal.

Any person unlawfully depositing or disposing of or in any way aiding or assisting in the depositing or disposing of, or provide for delivery of, any tire within the Kootenai County disposal system or anywhere within the Kootenai County in an improper manner shall be civilly liable for the full costs and expenses of cleanup, control, elimination, abatement, decontamination or other remediation which is undertaken by Kootenai County or any other public agency to properly correct damages or potential damages associated with said violation and/or,

- a. civil responsibility for the violation;
- b. criminal misdemeanor liability with a maximum of 6 months imprisonment and/or \$1,000 fine, and/or
- c. civil liability for cleanup costs
