Fund Balance Policy: General Definitions

Fund Balance: Fund balance represents the difference between fund assets and fund liabilities. Fund balance is intended to serve as a measure of the financial resources available in a governmental fund.

Fund Balance Target: A fund balance target is the amount to maintain as a specific fund balance. The target for each fund is 25% of annual *operational expenses* (A and B budgets). This practice takes into account the predictability of revenues, volatility of expenditures, and liquidity requirements of each fund. Adequate fund balance is necessary for unanticipated expenditures. It is particularly critical that major funds (General, Justice, Replacement Reserve and Liability Insurance) have adequate reserves.
